

## 1-3/4" & 2-1/2" SURFACE MOUNT KIT

### **BEFORE INSTALLATION**

·Lay parts on a clean, flat surface

• READ ALL INSTRUCTIONS BEFORE BEGINNING INSTALLATION!

# Package Contents 8 Screws Side Piece (2) End Cap Piece (2) • Packaging may differ depending on product ordered

## **Tools Required**

- Phillips screwdriver
- Drill

# TILT® Components Sold Separately

- Panels
- Speed Whips
- Driver

- 1 Attach one end cap to the two sides using four screws provided. Insert button plugs into the screw holes.
- 2 Loosely attach the other end cap. One screw in each side hole closest to the side flange.

3 Drill mounting holes as needed in the side piece flanges. Do not drill into the loose end cap piece. Mount to ceiling.

4 Remove loose end cap.

5 Drill a 1" hole into the ceiling or hard surface and bring the Speed Whip or Driver Whip through the hole. Drivers can be mounted directly behind the 2-1/2" frame (Step 5 won't be needed for this scenario).

6 Partially slide in the light panel and connect your light whip to the Speed Whip or Driver.

7 Fully slide in the light panel and test the fixture. Attach the end cap with the four screws left, then insert plugs.
